

Vitamin D 1,000 I.E. Mono-Tablets

Nutritional supplement with vitamin D3

Useful information:

Vitamin D is essential for many vital functions. As a preliminary phase of the hormone calcitriol, Vitamin D3, the active form of the vitamin in the body, plays an important role in achieving strong bones and teeth, a vital immune system and healthy muscle functions. The body can produce vitamin D itself through the sun's rays, which is why it is also referred to as the "sun vitamin". Young people and older people can suffer a vitamin D deficiency, generally in the winter months, but also due to our modern lifestyles, which is why a nutritional supplement is recommended.

Each capsule contains 25 µg vitamin D3 corresponding with 1,000 I.E.

	per tablet (=daily dose)	% of recommended daily amount according to NRV*	per 100 g tablets
Vitamin D3	25 µg	500	10 mg

* NRV = Nutrient reference value for the daily intake according to VO (EU) No. 1169/2011

Ingredients: Microcrystalline Cellulose (bulking agent), Vitamin D3 (0.01%), Magnesium Stearate, Silicon Dioxide (separating agent).

Recommended dose: swallow 1 tablet per day with sufficient liquid.

Keep dry and out of direct sunlight. Store below 25°C.

Nutritional supplements should not be used as a replacement for a balanced, varied diet, and do not replace a healthy lifestyle. Keep out of reach of little children. Do not exceed the recommended daily dose.

Contents 250 tablets = 63 g
